

The Mini Tower

Why Choose Westgate Security Mini Towers

Westgate Security Ltd's Mini Tower towers high-performance surveillance in a compact and flexible unit. Ideal for areas where full-sized towers are impractical, this fully self-sufficient unit delivers intelligent detection, long-lasting battery life, and rapid deployment without the need for external power. Designed for construction, remote sites, or sensitive zones, the Mini Tower provides robust protection with a minimal footprint. Linked directly to our 24/7 control room, it's a smart choice for standalone use or as part of a wider layered security solution.

Key Features

- **360-Degree Surveillance Coverage:** Full panoramic visibility, ensuring no blind spots around the unit.
- **Adjustable Detection Settings to Minimise False Activations:** Smart analytics allow sensitivity settings, avoiding unnecessary alerts triggered by wind, wildlife, or passing traffic.
- **Weather Hood for Sensor Protection:** A robust shield protects the motion sensors and cameras from rain, snow, and direct sunlight.
- **Photo-on-Demand Feature:** Enables authorised users or control room staff to request real-time images.
- **Strong Visual Deterrent:** Despite its compact footprint, the Mini Tower is 150cm tall as a deterrent to intruders or unauthorised visitors on-site.
- **113 dB Siren with Adjustable Duration:** An integrated loud siren can be configured to sound for 3 to 180 seconds when a threat is detected.
- **Fully Self-Sufficient:** Designed for remote or undeveloped areas, the unit operates independently from external power sources.
